Source: ECB.

1) Total technical reserves may include life insurance.

2) Defined benefit schemes include hybrid schemes.

3) Balancing item as defined in ESA 2010. In a defined benefit pension scheme, the level of pension benefits promised to participating employees is determined by a formula agreed in advance. The liabilities of a defined benefit pension scheme are equal to the present value of the promised benefits, and therefore in a defined benefit pension scheme net worth can be different from zero.

Source: ECB.

1) Total technical reserves may include life insurance.

2) Defined benefit schemes include hybrid schemes.

3) Balancing item as defined in ESA 2010. In a defined benefit pension scheme, the level of pension benefits promised to participating employees is determined by a formula agreed in advance. The liabilities of a defined benefit pension scheme are equal to the present value of the promised benefits, and therefore in a defined benefit pension scheme net worth can be different from zero.

Source: ECB.

1) Total technical reserves may include life insurance.

2) Defined benefit schemes include hybrid schemes.

3) Balancing item as defined in ESA 2010. In a defined benefit pension scheme, the level of pension benefits promised to participating employees is determined by a formula agreed in advance. The liabilities of a defined benefit pension scheme are equal to the present value of the promised benefits, and therefore in a defined benefit pension scheme net worth can be different from zero.
